

Dear Summit Parents,

My name is Lisa Goyer, and this is our 5th year as a Summit family. I have 3 sons. The oldest is a college graduate; my middle son graduated from Summit last year; and my youngest is in 8th grade at Summit.

My oldest son graduated from public school. While it was a satisfactory path, my husband and I wanted our two younger children to have a different experience. The spiritual investment, supportive teachers and staff, and feeling of family are what convinced us that Summit was where God was leading us.

After graduating last year, our middle son has experienced a much more seamless transition into college than our oldest son did. I believe that this is because Summit teachers offered time and effort to prepare our child for life beyond high school. His teachers were invested in his future academically and, most importantly, spiritually.

Our family's love for and connection to basketball runs deep. We have been part of the athletic program for all five years that we have been at Summit. When my son reminisces about playing, he always regrets not having a home gym. There is a certain comfort and pride that comes from having a space that genuinely belongs to your team. His hope and prayer is that his younger brother will have the chance to play in a real "home" game.

I am excited that Summit is committed to building our dream gym. They have planned several fundraisers and events in hopes of raising enough funds to begin construction soon. There is a fundraising Dream Gala on March 27, 2020, that will hopefully have a meaningful impact on making this dream a reality. A packet was sent home last week that contains information on the Dream Gala and ways you can help and support. This dream cannot be accomplished alone. It will take our entire Summit family, pulling together to make it successful. You can find more information on the Summit PFO Facebook page.

Our children deserve the absolute best, and we feel very fortunate to be a part of a school committed to making that happen!

Lisa Goyer
