May 26, 2023

NOW AVAILABLE TO ALL GRADE LEVELS

Microsoft Surface Laptop Go Order Now, Pay Later

Order before the May 26, 2023 deadline and choose to pay in full or spread payments out over ten months on your FACTS account. A great package value with flexible payments and no interest!

Flexible Payments

Choose to pay in one installment or spread payments across ten months via FACTS.

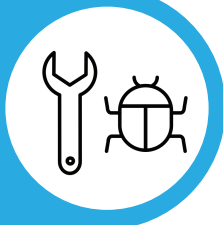

Quality & Reliability

The Surface Laptop Go is a well-constructed laptop that, if well cared for, should last for several years.

In-House Support

Summit's IT department prioritizes support for devices purchased through this program and offers a loaner device if repairs require extra time.

\$725 Package Includes

Microsoft Surface Laptop Go 2 in your choice of color - Intel i5, 256GB solid-state drive, 8GB RAM.

24 months of in-house warranty* provided by Summit's IT department and loaner services.

Urban Armor Gear protective shell that meets military drop standards.

Complete setup service. Laptop will be delivered pre-configured and ready for classroom use.

Details & Order Form

www.summit.school/laptop

*\$150 deductible applies to cracked screen repairs.

Laptop Purchase Program Device Information & Details

Laptop Purchase Program

The Summit Laptop Purchase program is available to all 5th - 12th grade students at Summit Christian Academy. It includes the Microsoft Surface Laptop Go, UAG protective case, setup and configuration services, and 24-months of managed in-house support provided by Summit IT staff. In addition, Summit will provide a loaner device to students if their laptop requires extended service from Microsoft.

Device Management Details

Summit's IT department will manage all devices purchased through this program throughout the two-year warranty period. Laptops will be locked down with an administrator password and restricted to school-related software only. The administrator password will be provided to parents only upon request. However, students should not be allowed to install non-school-related programs without permission from Summit's IT director. This policy aims to keep these laptops free of software that may slow them down or interfere with academic work.

Device Warranty and Service

Microsoft warranty support is good for 12 months. Summit will add 12 months for 24 months of in-house support. Summit IT will support laptop issues related to regular use - including software and hardware, providing the device remains in the UAG protective shell during the warranty period. *A \$150 deductible will be charged to repair a cracked or broken screen. A second broken screen will not be repaired by Summit.* We will not cover damages that we deem to be caused by misuse or accidents outside the school facilities.

Pricing and Payment Plan

Summit does not seek to profit from this program. Our goal is to make it easy for families to purchase a quality laptop, and it helps our teachers as they assist students in class. The Microsoft laptop, UAG case, set up service, and 24-month warranty are available for \$725. The total amount may be paid in full or added to your Summit FACTS account and payable in ten monthly interest-free installments during the school year. If your family relocates, you must pay the total balance due before any student records are released.

Participation is Optional

This is an optional program. You may choose to purchase your own Windows 11 device through an online or local retailer, provided they meet the minimum requirements of our BYOD program. (no Chromebooks or iPads),

- Laptop requirements are on our website at <https://summit.school/technology>.
- Computer setup instructions for those providing their own device are available at <https://summit.school/computers>.

Summit provides and requires all students to use our version of Microsoft Office, Malwarebytes antivirus software, LanSchool, and e-textbooks if applicable. Summit IT does not provide device support for laptops purchased outside of our laptop purchase program. We recommend purchasing an extended warranty.

Microsoft Surface Laptop Go & UAG Shell
