

# Keeping Your Students Safe Online

Securly Home is your school's new technology partner that allows you to stay on top of your child's digital education.

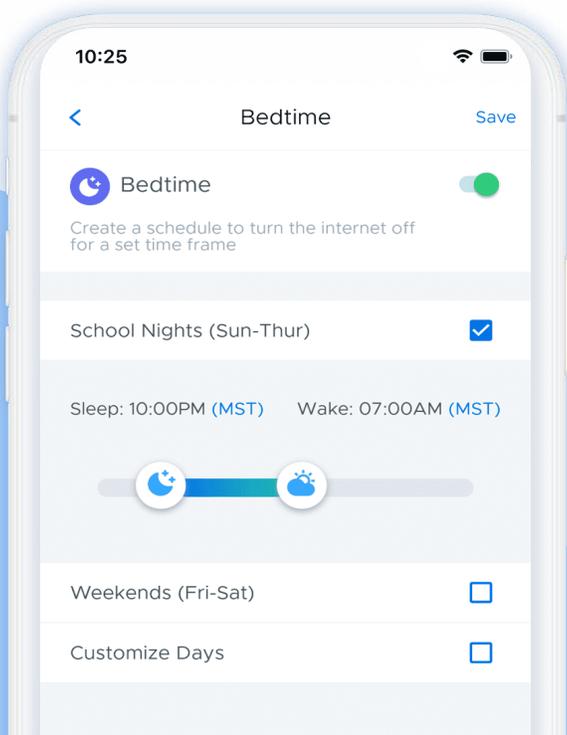

Summit Christian Academy is committed to partnering with families to provide a safe and responsible digital learning environment. As part of that commitment, we are pleased to introduce Securly Home, a tool that allows parents to stay informed about their student's online activity and promote healthy digital habits.

## About Securly Home

Securly is a leading student safety platform serving over 15,000 schools and protecting more than 15 million students worldwide. Through Summit's partnership with Securly, we are able to provide internet filtering and activity monitoring to help protect students from inappropriate content and encourage responsible online use.

## Who Has Access

Intermediate School (Grades 5–8): Securly Home has been installed by default on all school-issued devices. High School (Grades 9–12): Securly Home is available upon request for families who wish to enable it on their student's device.

## What Securly Home Provides

Parents and guardians can use the Securly Home App to:

- View their child's online activity in real time.
- Receive weekly email reports with a snapshot of their student's browsing activity.
- Have meaningful conversations about digital responsibility and online learning habits.

for free on both iOS and Android.

## Important Note

Summit Christian Academy partners with Securly to equip families with tools that encourage safe and responsible online use. While the system provides strong filtering and monitoring capabilities, no solution can guarantee complete protection from all online content. We understand that each family has its own perspectives and priorities when it comes to internet safety. Securly offers a meaningful way for parents to stay informed and involved while maintaining the level of oversight that aligns with their family's values.

## Student Reactions

We recognize that students may not always enjoy having internet filtering in place—especially if they have had unrestricted access in the past. However, we believe that healthy boundaries are an important part of nurturing young minds. We encourage all parents to take advantage of this powerful tool to help safeguard their children's online experience.

## Requesting Access

High School parents who wish to have **Securly Home** added to your child's laptop should email [support@summit.school](mailto:support@summit.school).

## Requesting Removal

Parents who wish to have **Securly Home** removed from their student's BYOD device should email [support@summit.school](mailto:support@summit.school) and cc their student's principal

# Securly Home FAQ

## How do I get the Securly Home app?

- Download the app from your app store. Tap the Login button and choose the **“Get instant access”** option after entering the email registered with your school.
- **Check your email for an email titled “Your Securly login link”.** Click on it to open the app.
- You're now logged in and ready to go!

## Why am I receiving an email from Securly?

- Summit Christian Academy uses Securly to provide the best online student safety solutions, and parents' email addresses are registered by the schools.
- Once registered, you gain access to the SecurlyHome app and will begin receiving weekly email reports containing a snapshot of your child's online activity.

## The school registered my email address, but I still haven't received an email from Securly. What happened?

- Don't worry, it can take **24-48** hours for everything to load from a school district.
- **Be sure to check your Spam/Junk folder for an email from Securly.**
- Contact us at [homesupport@securly.com](mailto:homesupport@securly.com). We're here to help!

## Can I add an email address to my child's account?

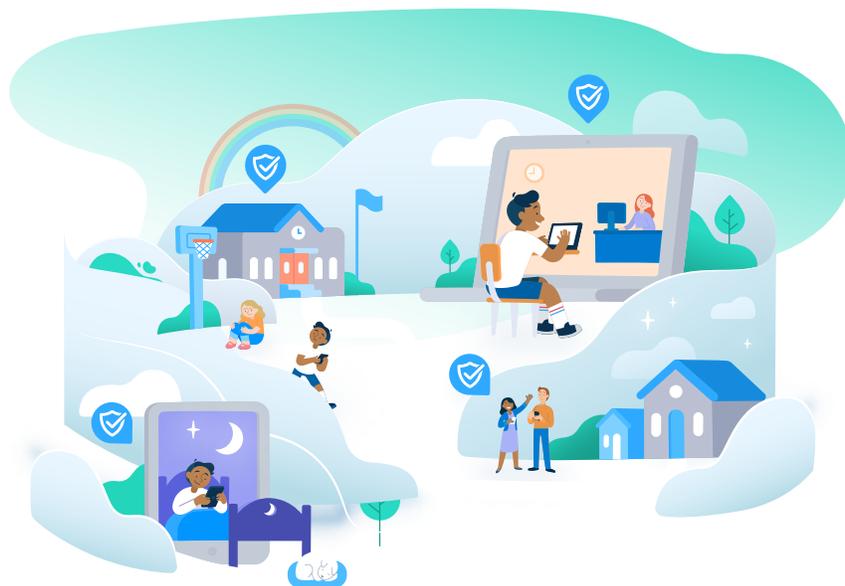

- For security reasons, only your child's school is authorized to register emails, so contact them to request any changes.

## What data does Securly collect?

- Securly monitors your child's online activity while at school, and off-campus if they are using a school-issued device filtered by Securly.
- Securly collects school-issued email addresses, public IP addresses (available to anyone online), visited websites, searched terms, YouTube videos, and social media posts (if social media is allowed by the school).

## What if I have questions not addressed in this FAQ?

Email [homesupport@securly.com](mailto:homesupport@securly.com) and one of our Parent Support Agents will assist you.
